The Elephant in the Room

This Fellowship takes on a key challenge: the reality that professionals are not well prepared to deal with death, dying, and grieving families. The Fellowship allows participants to learn, confront, and discuss the legal, medical, social, cultural, familial, and spiritual aspects of death and dying within a multi-disciplinary group in a low-pressure environment. The sessions will include site visits, facilitated conversations, and opportunities to practice conversation skills—a timely skill since Medicare approved payment for advance care planning. During the final session, Fellows create a community action plan.

70% of Americans prefer to die at home; only 25% actually do

80% of people want to talk to their doctor about end-of-life care; only 7% have

90% of people think it is important to talk about end-of-life care with family; less than 30% have
